Mounting the topcase bracket

1. Find the two reinforcement parts and 4 thin and 2 thick aluminium washers.

2. Place the two thin alu. washers (3mm.) as shown in the picture.

3. Position the two reinforcement parts as shown in the picture.

GlobeScout Adventure Equipment

4. Place the black support part on the bike and screw the four bolts.

Note : If no side case carrier is mounted, place the thick aluminium washers (5mm.) under the front holes of the reinforcement parts. If the side case carriers is mounted, this washers will not be used.

5. Place the other 2 thin alu. washers (3mm.) as shown in the picture and place the rear passenger handlebar carefully to the bike. Left and right screws simultaneously. Pay attention that the washers do not fall inside the rear section of the bike. If so, you can pick them up after you remove easly the big grey cover.

6. Check the correct position of the handle bar with the black plastic support.
